iLAND

Quick Start Guide
For
Android Devices

Install the iLAND App
Search for and download **iLAND Diagnostics** from the Google Play Store.

User Registration
Open the App, select **Sign Up**, enter your email address and follow the on-screen instructions.

Adapter Registration
To register the adapter please enter the Serial Number and Activation code included in the adapter packaging.

Model selection
After registration you will be asked to choose a model to activate.

Install Vehicle Software
If you have purchased **iLAND Pro** you will be able to download diagnostic software for all models after installing the app.

Install iLAND Adapter
Step 1: The diagnostic port is normally located under the dashboard or around the center console (See below.)

Step 2: Plug the Adapter into the diagnostic socket. The connector's power indicator will light up to signify communication and you will hear an audible beep.

Search for Adapter
Select "Search Bluetooth" from the options at the bottom of the screen.

Scan for Adapter
Follow the on-screen instructions. Note: The adapter name will be the serial number of the adapter and should Pair automatically.

Model Selection: Models which have been purchased and downloaded will be illuminated. iLAND Pro users can download additional model coverage by clicking the "down" arrow on a vehicle.
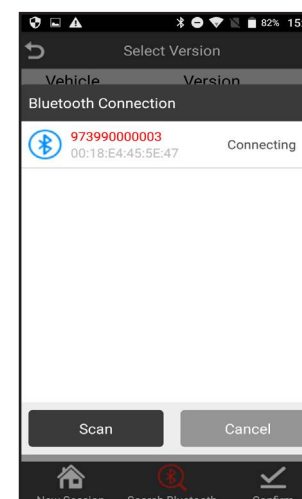

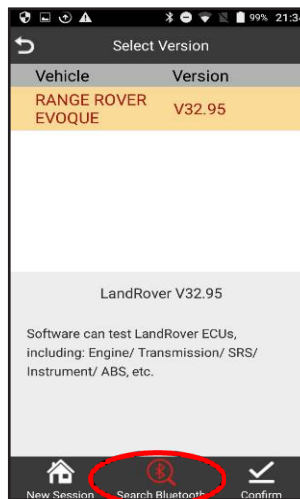

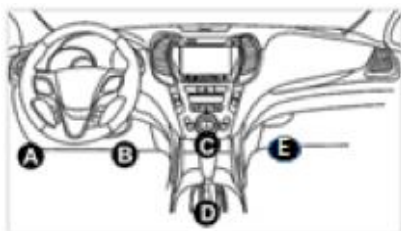

Updates & Connectivity: iLAND does not require internet connectivity to run vehicle diagnostics, however you should update your iLAND periodically for the latest features and coverage. You will need Wi-Fi or mobile data Internet connectivity for updates.

Vehicle software updates: Ensure you have internet connectivity on your device, then within the app, go to **Settings, Software upgrade**. Any available upgrades will be listed and you should tap to download and install updates.

Bluetooth Adapter Firmware Updates: While in your vehicle, ensure you have internet connectivity on your device then connect the Bluetooth adapter to the vehicle`s diagnostic port and open the iLAND app. Leave the adapter connected for a few minutes. If new firmware is available, it will update automatically.

iLAND
