SECTION B-B
SCALE 1 : 7

If your fridge height is greater than the height of the slide handle (H4), the usuable tray length (L1) will be reduced by 35mm.
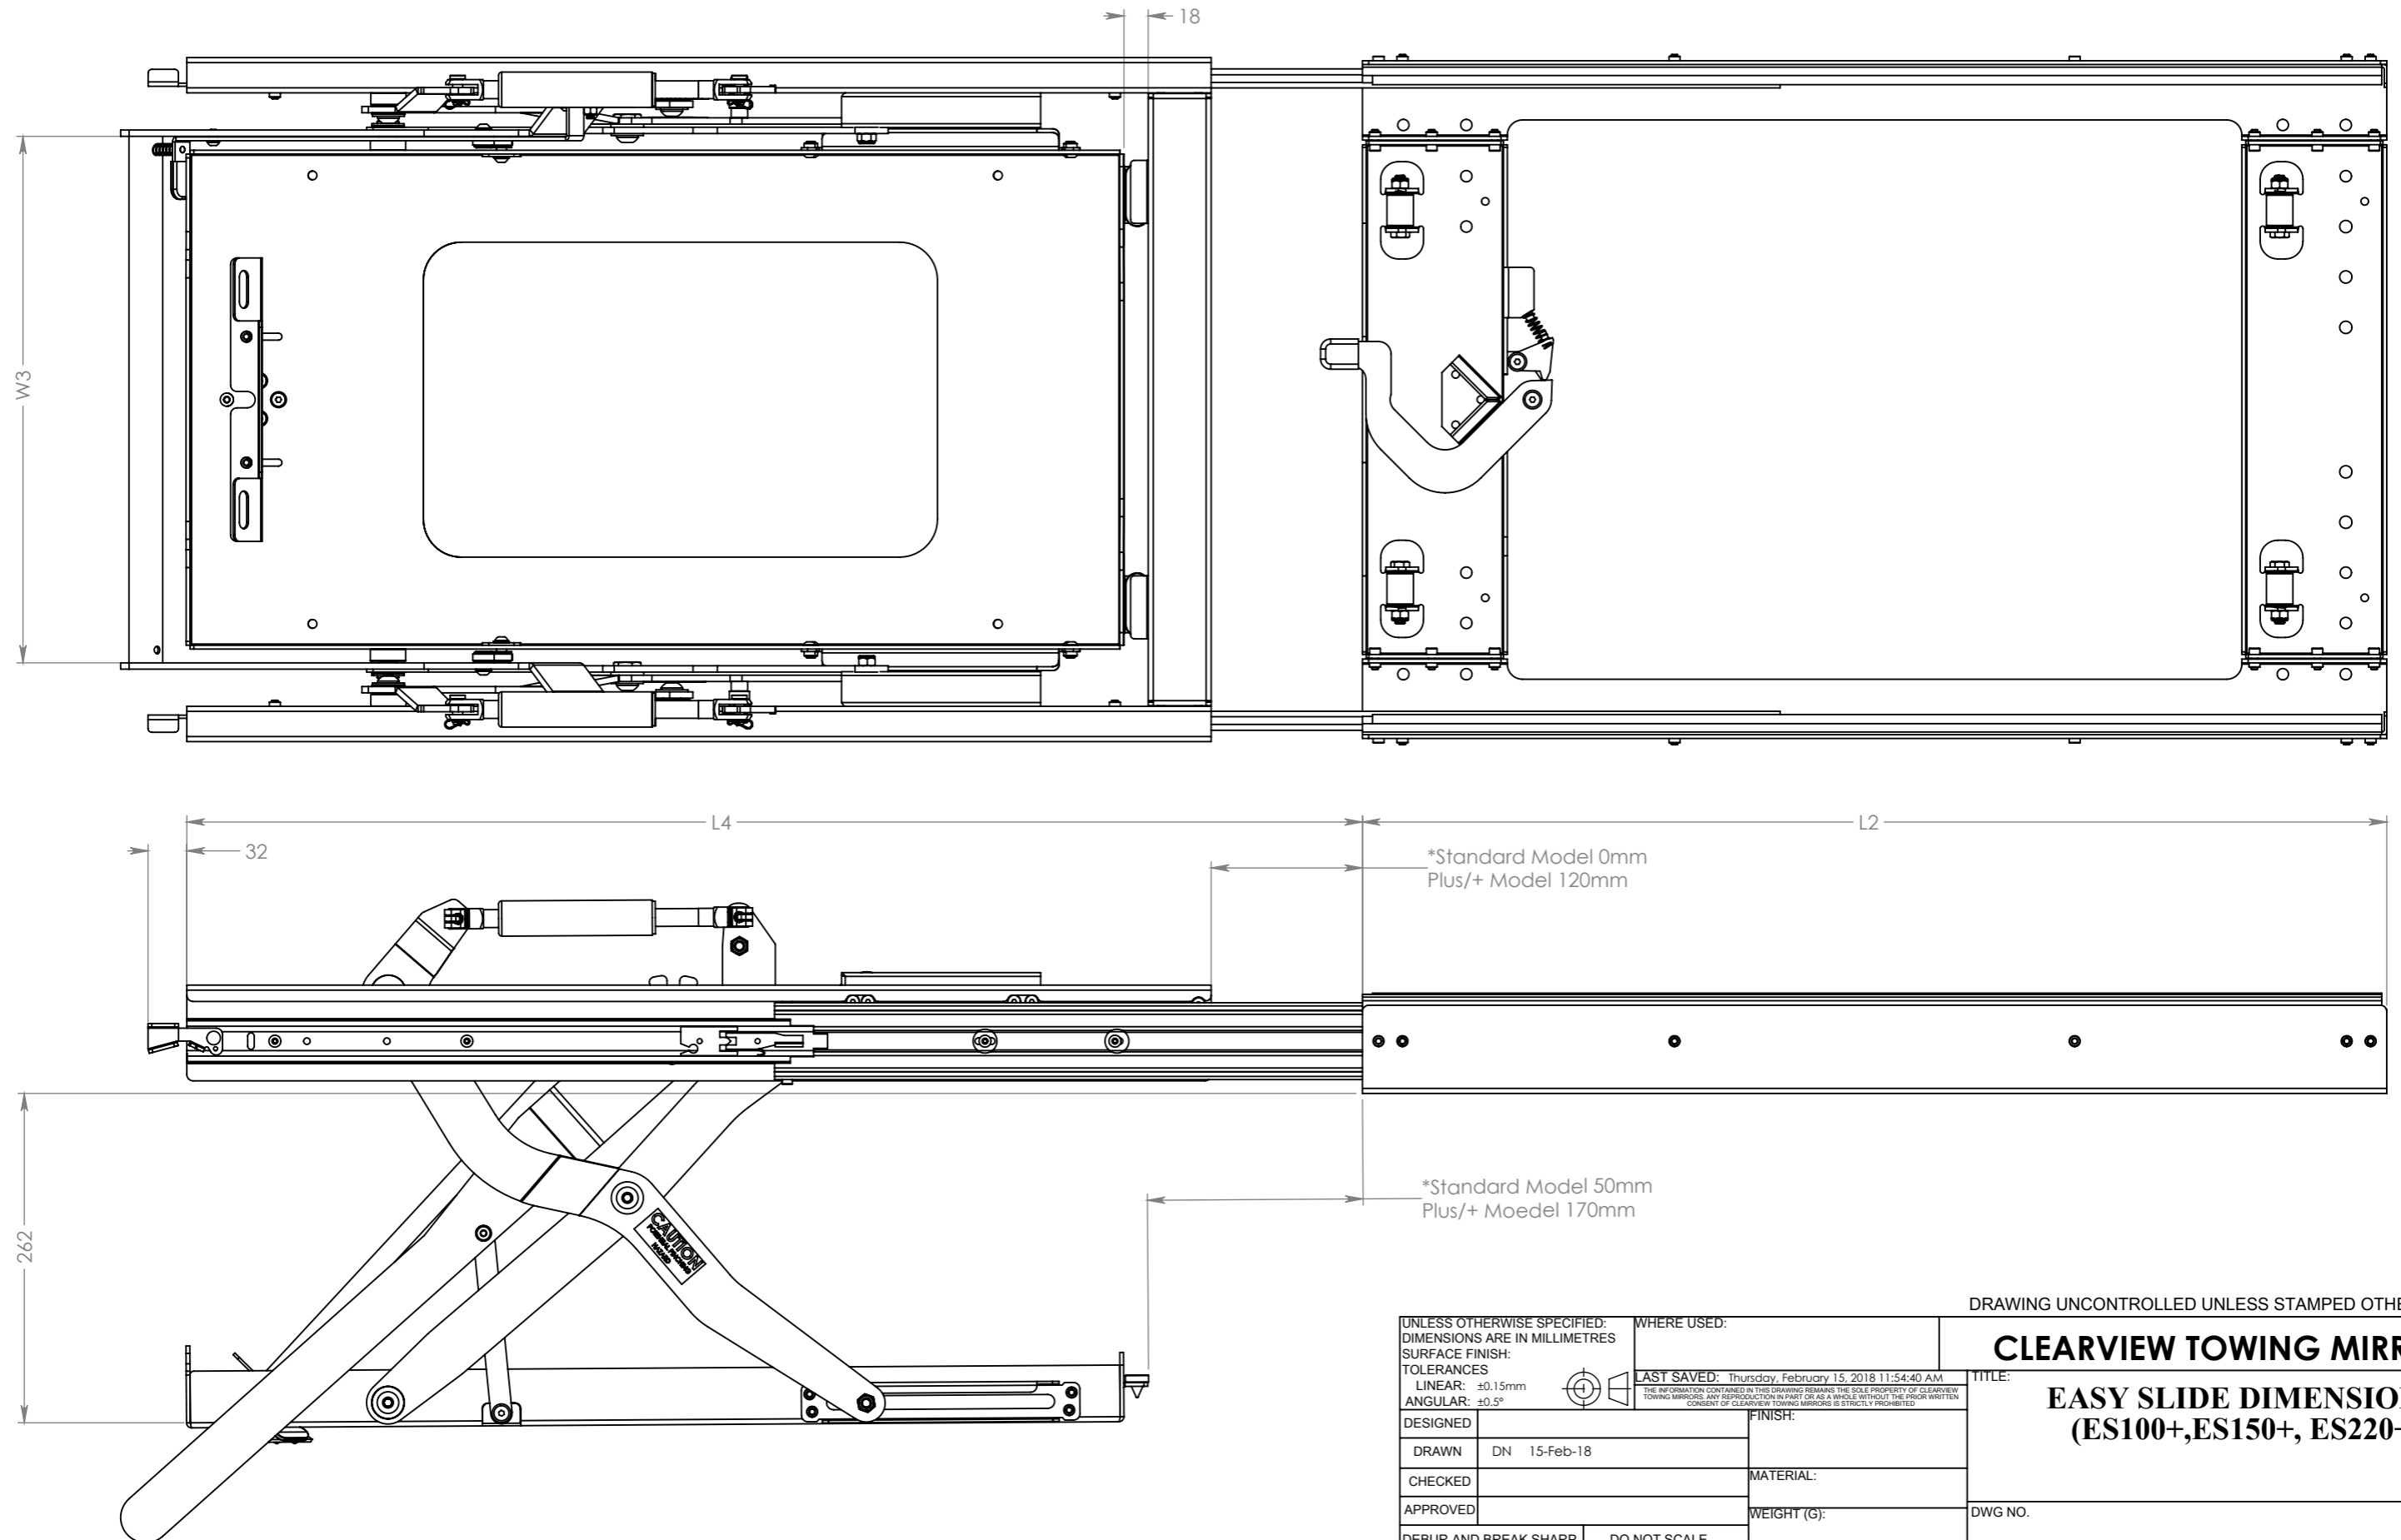

Please also check your fridge dimensions to ensure clearance around the trigger mechanism found on the left side of the handle. You will need access to this trigger in order to lower and raise the Easyslide.

UNLESS OTHERWISE SPECIFIED:
DIMENSIONS ARE IN MILLIMETRES
SURFACE FINISH:
TOLERANCES
LINEAR: ±0.15mm
ANGULAR: ±0.5°

Canopy Door

L2-3

H4
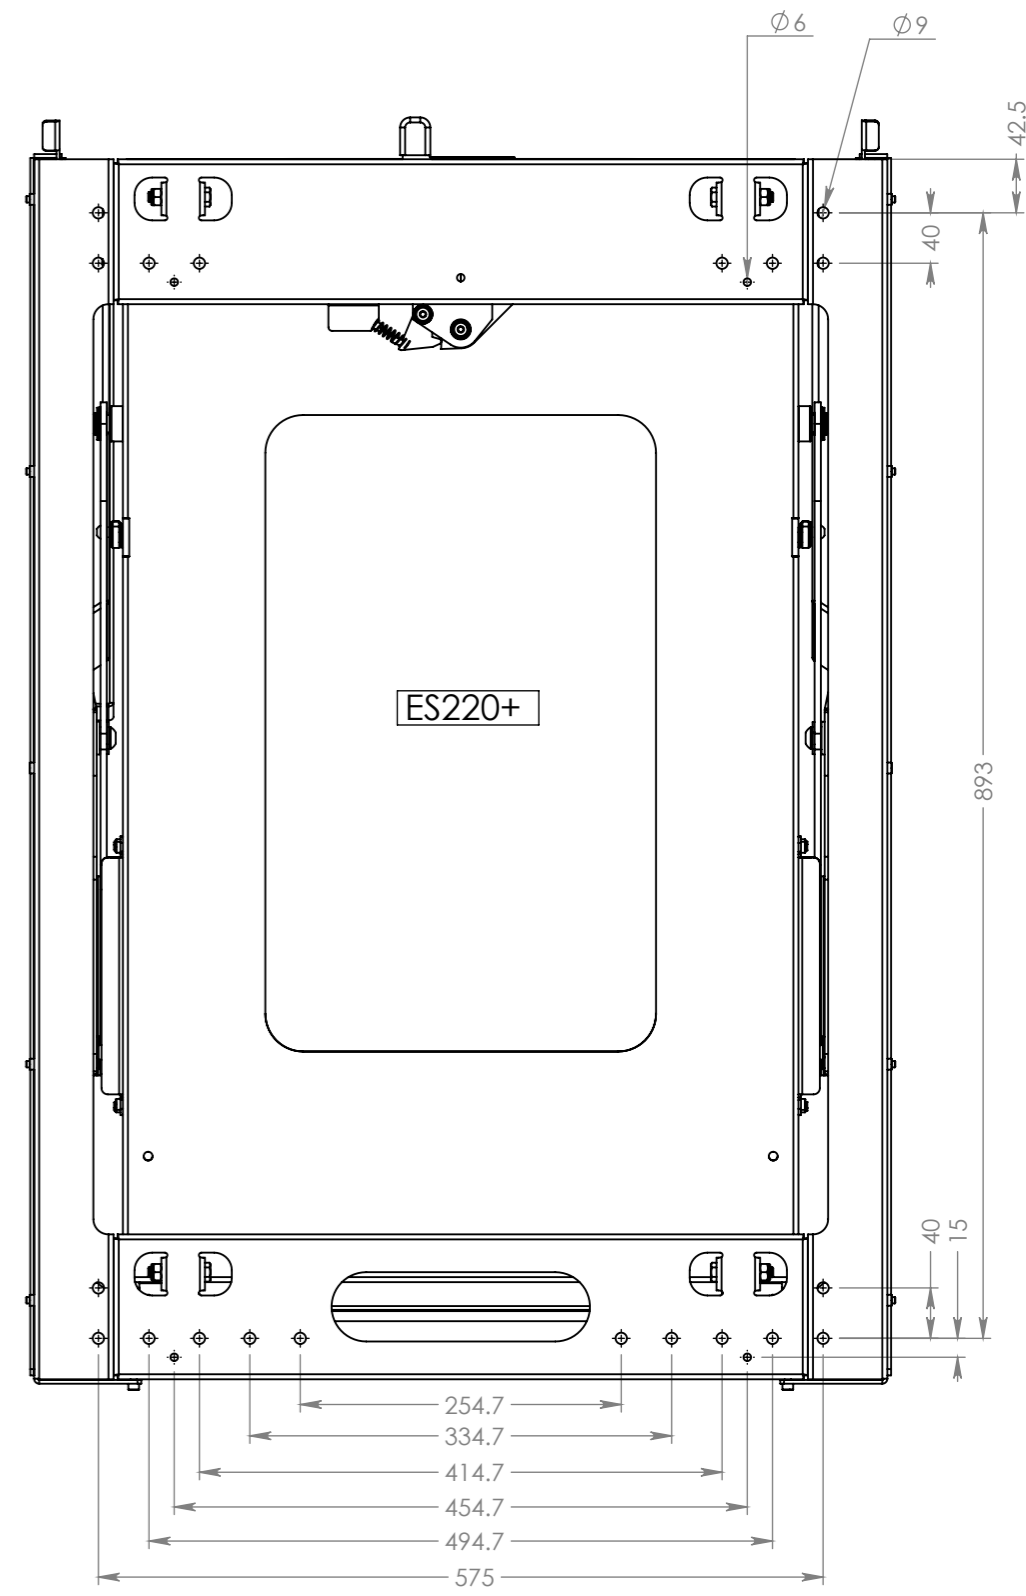

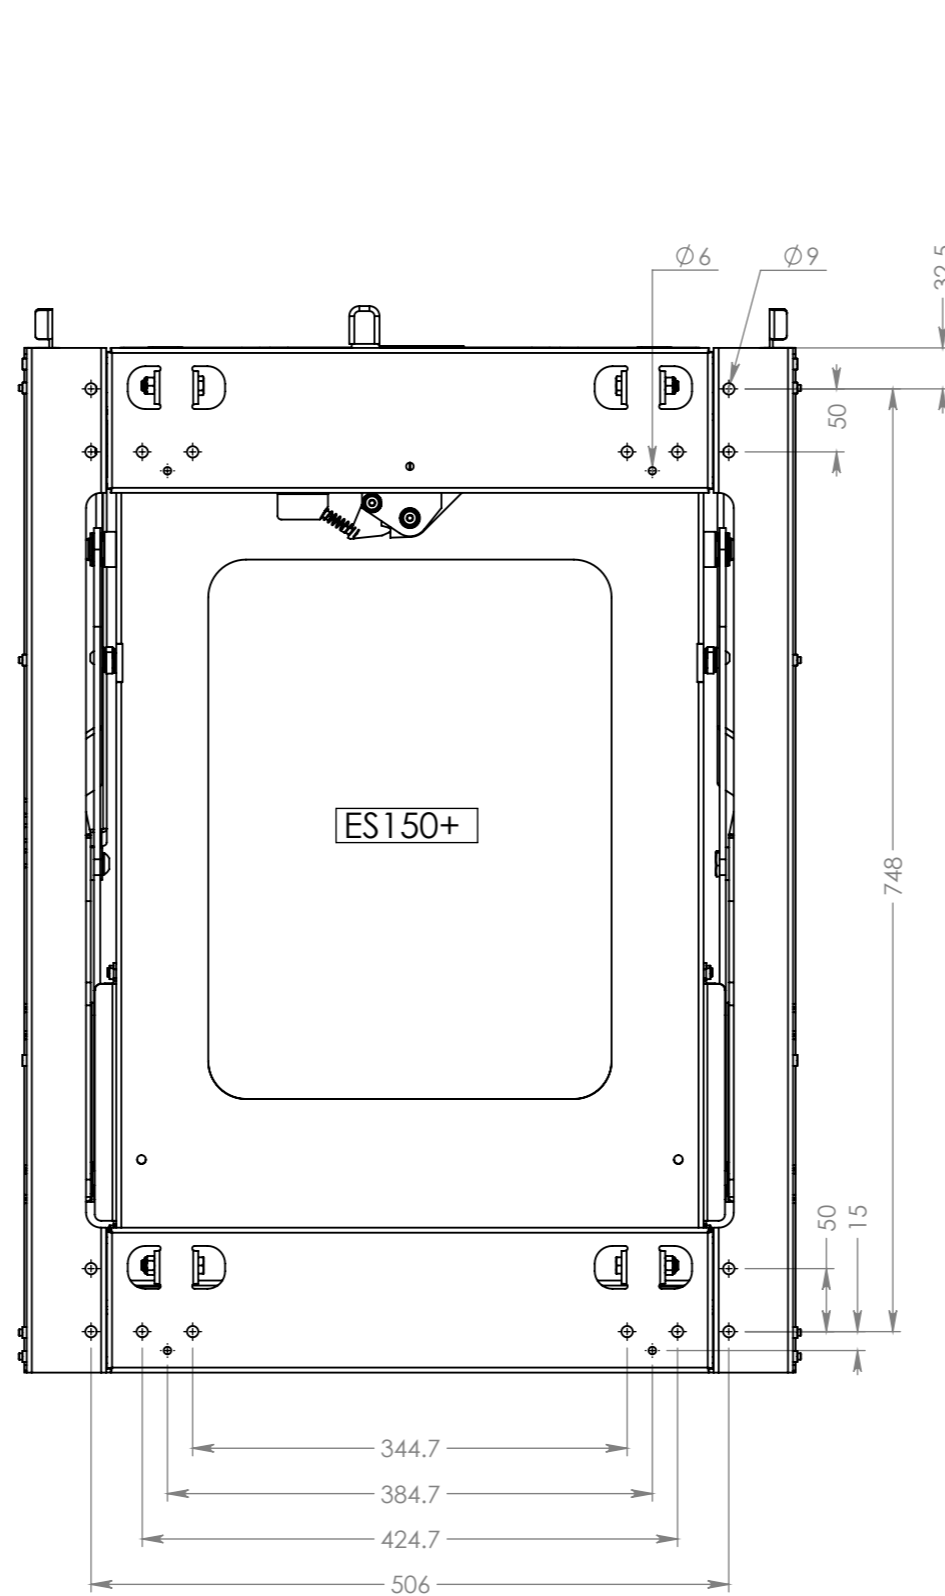

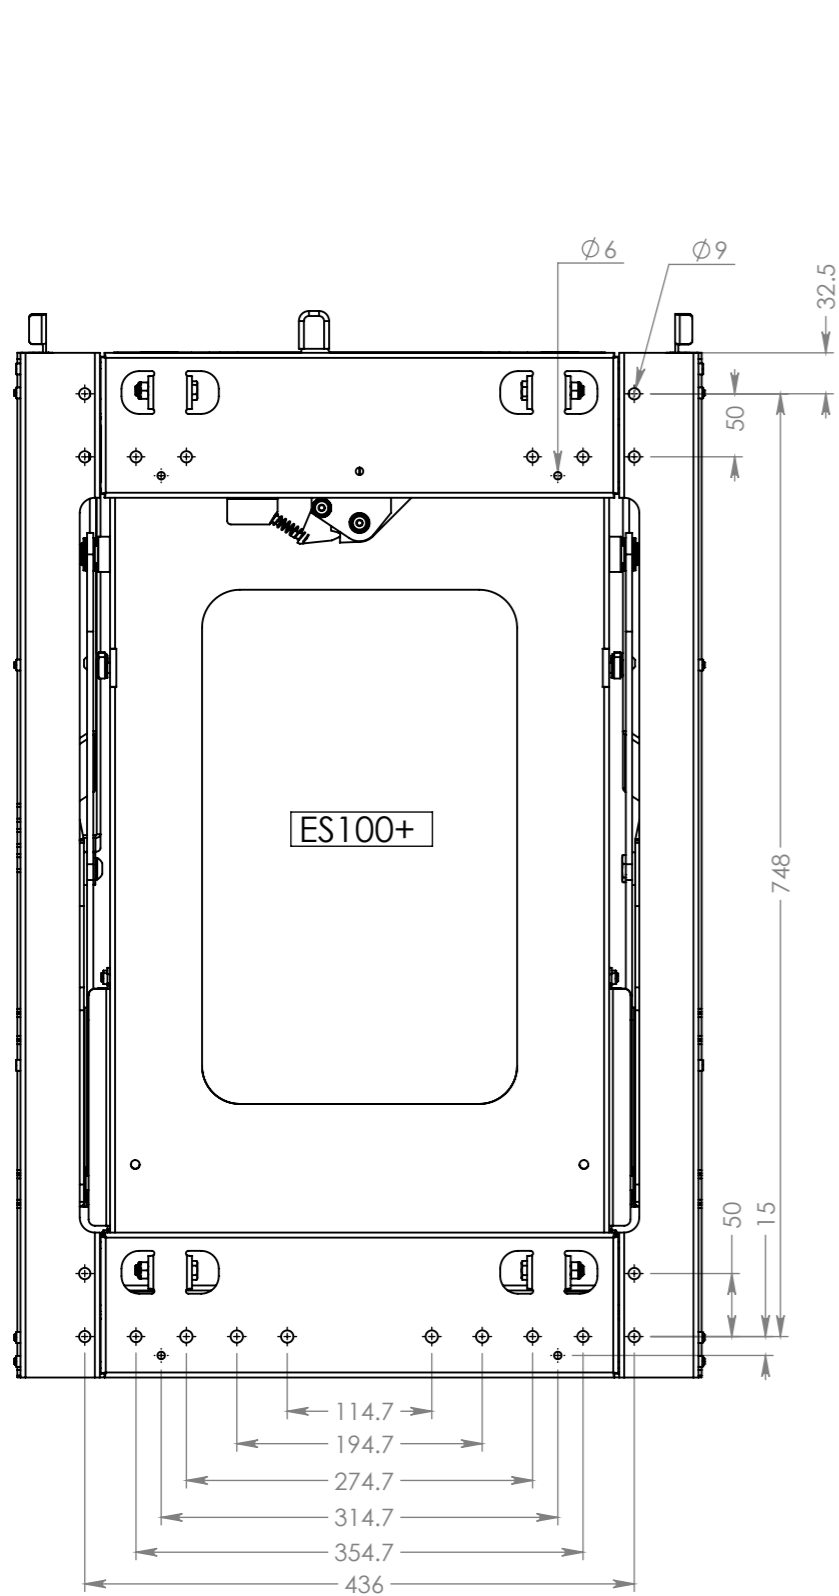

Set back distance

Your drawers

Some factors to consider when working out the setback distance required.

- Whether the angled canopy door/boot lid will interfere with handle/lock levers of the Easyslide or top edge of your fridge.

- There is sufficient rail travel to allow the Easyslide to lower without any interference (sides and back of ute trays/canopy, wheel guards etc).
