

BP offers a choice of OEM or premium aftermarket brake pads: OEM are original fitment, usually with pins and clips. Brake pads or shoes are sold as an axle set; they do 2 wheels. Seal kits do one caliper.

Pads & Shoes	D90,110 front	Wagner: MX671
	Discovery 1 front	Wagner: PD520
	D90, Disco 1 rear	Wagner: MX518
	Rear shoes, D110 only	STC2797G
	Pin & spring pad retention kit	STC8575
	E-brake shoes, w. side adjuster	STC965
	w. bottom adjuster	ICW500010
	E-brake drum	FRC3502

Genuine Castrol DOT 4 brake fluid:
 12 oz. GTLMA 32 oz. GTLMA/L

Tech Tip: Brake Hydraulic System Care

Calipers require periodic maintenance for best brake operation. Replacing the brake fluid is an LR specified maintenance procedure, to be done roughly every 48,000 miles: this removes water and contaminates, preserving the seals and the piston surface. Should a piston begin to leak or stick, usually a new piston and seal kit will put it right: no need for a whole caliper assembly. Any major brand of DOT 4 fluid will work fine. Our Mityvac or our Power Bleeder are good tools for one person alone to do the job with.

Euro Power Bleeder
 pushes fluid through the system: 0100

Mityvac Pump
 pulls fluid through or empties reservoirs
 386-215

Weight is the enemy!

All vehicles have a GVW gross weight rating. That's based on things like the size of the master cylinder. Do you know your safe load limits?
