D110 Style, 6" wide
ANR1534PM

NATO style, 6-1/2" wide
ANR5593PM

Lug Nuts

Double sided (Ser II, IIA to '67)	217361
15/16" (Ser IIA, '67 & '68)	561254
1-1/16" ('69 thru mid '71)	57613
Metric ('71 through present)	RRD500010

Locking Lug Nuts

Locking lug nut set, steel rims, 5 with socket: GLN002

Rocky Mountain

Parabolic Springs

We sell Rocky Mountain parabolic springs because we believe they are the best parabolic spring available. Springs come with bushings installed and new U-bolts. Parabolic springs should be used with stiffer shocks that have a longer extended length. We recommend Old Man Emu gas shocks found on page 37

Front, all models: 73588P

These springs have two parabolic leaves with a military wrap on the second leaf. They are appropriate for all 88" and 109" models.

Rear, all 88" and 109" regular: 73590P

Standard duty three leaf parabolic springs. Designed to accept heavier loads. They work great for 88" Station Wagons, and 109" pickups. For 109SW's, see below.

Rear 109SW: 73591P

Heavy duty four leaf rear springs used on '109' models for service where constant loads are normal. These springs are fitted to five door "Safari" models, and if you carry extra weight in your '109' Regular pickup. These will cause the rear of light weight vehicles to sit high.
