

Wire by the foot

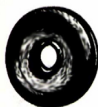

Wiring Harness

SII, '58-'60 positive gnd. (incl. tail section)	LR201
SIIA, '60-'65 positive gnd. (main harness)	LR202MPP
SIIA, III, '66-'71 Neg. gnd (main harness)	LR203MPP
SIII, '71-'80 (main harness)	LR302

Sub Harnesses

Rear harness, 88, to '74	1488PP
Rear harness, 88 '74 on	LR334
Rear harness 109	1489PP
Wiper motor harness, '69 on	LR222
Ignition switch harness, '69 on	1493PP
Engine harness, SIII	LR323
Head lamp pigtails	BW141

Fire wall Grommets

When wiring passes through a fire wall grommets are needed to protect wire insulation from the sharp metal edges. Rubber grommets deteriorate over time. Whenever you replace wiring it is always a good idea to replace the fire wall grommets. Verify hole size before ordering.

Main harness through fire wall (1 hole)	BW553
Speedo cable through fire wall (3/4)	BW552
Turn signal wiring thru inner fender (1/2)	BW551
Wiring thru radiator panel (1/2)	BW551

Bullet connectors

Bullet connector, universal solder	CWB320
Bullet connector for 14 strand wire	BW314
Bullet connector for 28 strand wire	BW328
Bullet connector for 44 strand wire	BW344

Single barrel connector, connects 2 wires	BW311
Double barrel connector, connects 4 wires	BW312
Triple barrel connector, connects 6 wires	BW323

Bullet ground connector, connects 2 wires 236366
(Screws to body or frame for ground point)

Note: This stranded wire comes in three sizes, 14, 28 and 44 strands. The numbers are not wire gauges. Therefore the larger the number the larger diameter the wire and the higher the amp loading.
